

Turn energy savings into classroom resources.

Financing through the use of an Energy Savings Improvement Program or ESIP is the most efficient way to implement energy conservation measures for New Jersey school facilities. Energy savings are used to repay the costs associated with certain building improvements, and no referendum is needed. As a result, excess savings go back to the classroom where they belong. As the top ranked financial advisory firm in New Jersey, Phoenix Advisors can assist your district with a successful ESIP. Contact Robbi Acampora at 609-291-0130 to fuel your students' success.
